Table notes

† These data are provided for information only. For schools whose main headquarters are outside the US figures are based on average dollar currency exchange rates for 2012. ‡ The first figure refers to the number of individual surveys completed by clients of the business school. The figure in brackets indicates the total number of years of survey data included in this ranking. Data are retained for those schools that participated in the 2012 or 2011 ranking but were unranked in that year. *Includes revenue from food, **Includes revenue from food and accommodation, ***Aggregate total for open and customised programmes. Although the headline ranking figures show changes in the data year to year, the pattern of clustering among the schools is equally significant. About 330 points separate the top school, Duke Corporate Education, from the school ranked number 70. The top 13 business schools, from Duke CE to Harvard Business School, form the top group of custom providers. The second group is lead by IE Business School and the third by Rotterdam School of Management. The top and bottom schools
