Standout	Mishcon de Reya	9	9	8	26	A series of initiatives to integrate technology into everyday working includes an eDiscovery business, a cyber-security consultancy and MDR Lab, a technology incubator. The incubator has supported six start-ups to develop tools in partnership with its lawyers. The firm is now using these tools within its practices and with clients.
Standout	Linklaters	8	8	9	25	A new LegalTech team of 15 product specialists work alongside the firm's lawyers to develop and sell combined legal and technology solutions for clients.
Standout	Simmons & Simmons	9	9	6	24	A software tool allowed clients to review their EU trademark portfolios, identify trademarks that were eligible for amendments, and to then generate the paperwork for filing in a six-month window last year under a new EU regulation. Commended: Darren Meale
Standout	DLA Piper	8	8	8	24	Ascendant 2.0 helps clients compare vendor bids in large procurement projects. A central database captures market standards for technology and sourcing contracts. Commended: Kit Burden
Highly Commended	Rousaud Costas Duran	8	7	8	23	The firm has formed a partnership with Spanish start-up Signaturit to adapt e-signature technology to collect evidence and create proof that companies have fulfilled compliance requirements under Spanish corporate crime laws.
Highly Commended	Pinsent Masons	7	8	8	23	A suite of document analytics applications on the firm's TermFrame platform has changed the way lawyers review, analyse and report on large volumes of documents for ring-fencing compliance, contract review and data protection projects. Commended: Lucy Shurwood
Highly Commended	Linklaters	8	8	7	23	Through its technology offering, Nakhoda, the firm is developing its own artificial intelligence and other applications to help clients with specific challenges. Commended: Edward Chan
Highly Commended	Garrigues	7	8	8	23	Developed by the firm's G-Advisory consulting team, Core is a new application to manage company compliance for corporate crime, data privacy, environment, quality assurance and security risks.
Highly Commended	Eversheds Sutherland	7	8	8	23	The firm has developed a new completion process for M&A transactions, using an online electronic signature platform to make the process faster and easier by allowing parties to sign from any location.
Commended	Multilaw	7	7	8	22	The network's roll-out of a cloud-based system to track referrals and centralise management of client relationships has helped it to generate new work and clearly demonstrate its value to member firms.
Commended	Gowling WLG	7	7	8	22	The firm has deployed robotic process automation tools used in large corporations to automate its own internal finance and human resources work, freeing staff to concentrate on more challenging tasks.
Commended	Berwin Leighton Paisner	7	7	8	22	The Title Recall system accesses and downloads title information from the UK's Land Registry databases, reducing duplicate requests and producing cost savings for the firm and its clients.
Commended	PLMJ	7	7	7	21	The firm created a new process, system and mobile app to help its lawyers manage around 200 new procedural deadlines for Portuguese courts each day.
Commended	Maples and Calder	6	7	8	21	The Maples eServices platform is used to manage clients' global portfolios of corporate entities, providing clients with quick access to documents and the ability to map ownership relationships between entities.
Commended	CMS	7	7	7	21	The CMS Evidence team is using Brainspace, a concept analysis technology used by government and investigative agencies, to change the way its litigators approach case analysis and investigations.
