

Award	Law firm	Total Innovation Score	Originality	Rationale	Impact	Description
Standout	Riverview Law	28	10	9	9	Over two years Riverview Law has transformed itself into a technology-led business. It formed a partnership with the University of Liverpool to work with its artificial intelligence experts to develop a cognitive computing application. Called Kim, the technology powers a virtual assistant that helps in-house lawyers manage legal processes and assess new instructions coming into their departments. It allows them to collect and use data to manage workflow, ensuring the right people are doing the right work.
Standout	Allen & Overy	27	8	10	9	The firm's new MarginMatrix tool automates legal analysis, document drafting and compliance with new derivatives rules for big financial institutions. Its partnership with Deloitte enables it to make this technology part of a complete service. Commended: David Wakeling.
Standout	Pinsent Masons	25	9	8	8	The firm's knowledge management system guides lawyers through the steps of a case, while connecting them to relevant documents and information. Commended: Orlando Conetta.
Highly commended	Berwin Leighton Paisner	24	8	8	8	Worked with RAVN Systems to develop its Applied Cognitive Engine to do repetitive document review work for real estate clients. Commended: Wendy Miller.
Highly commended	DWF	24	8	8	8	Analysed 14 years of data on fraud cases to help insurance clients predict claimants' behaviour and develop strategies to counter fraud.
Highly commended	Simmons & Simmons	24	8	8	8	An in-house ediscovery technology team has developed a range of tools and techniques using its Relativity software platform.
Highly commended	Taylor Vinters	24	9	8	7	The firm acts as an incubator, investing in and supporting the development of legal technologies such as ThoughtRiver, which analyses contracts.
Highly commended	Bates Wells Braithwaite	23	7	8	8	Get Legal is an online tool that makes drafting tailored legal documents affordable for charities and social enterprises.
Highly commended	Mishcon de Reya	23	9	8	6	Launched an ediscovery facility as a separate business to do disclosure work at greater speed and eventually provide services to other law firms.
Commended	Addleshaw Goddard	22	6	8	8	AG In-form delivers detailed financial data to lawyers and staff so they can make informed real-time financial decisions.
Commended	Axiom	22	7	8	7	Helping clients capture, structure and use their contract data to measure and manage risk and negotiate better contracts.
Commended	Baker McKenzie	22	7	7	8	Rolled out a new ediscovery platform globally, allowing the firm to provide a more consistent and round-the-clock service to its clients and lawyers.
Commended	Dentons	22	8	8	6	In partnership with Seedcamp, Nextlaw Labs, whose lead investor is Dentons, has run a competition for legal technology start-ups in Europe and is funding the winners.
Commended	Linklaters	22	8	8	6	Verifi automatically searches and classifies banking clients' customers to help them comply with new ring-fencing legislation.
Commended	NautaDutilh	22	7	8	7	Built a coalition of Dutch law firms to develop an interface for law firms' systems to work with the Netherlands' Department of Justice's new online document portal.
Commended	Paul Hastings	22	7	8	7	Developed a database and data model to map a non-profit client's data and automatically generate compliance contracts.
Commended	Pinsent Masons	22	7	8	7	Using clients' data to provide them with previously unavailable insights into construction and infrastructure disputes.
Commended	Cooley	21	7	7	7	Leveraged the firm's US expertise, resources and technology to help a UK client, IT consultancy Ciber, do fast and affordable ediscovery for a litigation case.
Commended	Gowling WLG	21	7	7	7	Set up a software platform that allows lawyers to code a stamp duty land tax calculator for complex leases. Commended: Chris Bond.
Commended	Gowling WLG	21	6	8	7	Developed a tool to sweep eBay for intellectual property infringements for a client, allowing the firm to monitor the site daily at minimal cost and to collect valuable new data.
Commended	Hogan Lovells	21	7	7	7	The firm's Prism technology generates a report with a timetable, costs and action lists for early case assessments in disputes.
Commended	Kemp Little	21	7	7	7	Developed legal technology solutions for its clients, including Klerical, which automatically reviews data licences and contracts.
Commended	Matheson	21	6	8	7	Mapped the workflow of a litigation matter and created 350 precedents and letters to build a system to help manage healthcare client disputes.
Commended	Simmons & Simmons	21	6	7	8	Developed a tool to help clients with Mifid II compliance. It can be used to project-manage the process and is accessible to non-legal colleagues.
Commended	Tools4Legal	21	7	7	7	Created tools for multinational companies to manage high-volume corporate governance, real estate and data privacy work.
