Table notes

The gross sales are an estimate of life and pensions and investment products sold from July 2012 to June 2013, obtained through Matrix Solutions' Financial Clarity product, which receives information from providers and platforms. Where applicable, we have included data from business' execution-only platforms. The figures have been rounded up, and in some cases two different ranks produce the same sales. Where two figures are similar they have been ranked by Matrix Solutions according to their data.
 [As of 10 April 2014, this ranking has been updated to take account of new figures.]
