Table notes
 The list includes only firms whose primary business (i.e. majority of sales) is classified by Matrix Solutions as financial advisers, wealth managers and banks are included.
 □ Individual firms that are affiliated with a wider group are included within the figures for the wider group and appointed representatives are included within the figures for their principal, regardless of whether they could appear individually.
 □ The figures for the list have been rounded up and include assets invested in retail discretionary funds, reported to Matrix Solutions by our Financial Clarity partners, other assets, such as those invested in discretions and portfolios, hedge funds etc. are not included
 □ Matrix Solutions receives data directly from fund managers covering 90 per cent of the UK retail investment market into the Financial Clarity product. Fund manager data is further supplemented and enhanced with platform feeds. The top 25 fund managers account for 80 per cent of retail assets under management and Matrix Solutions received sales data from 22 of these investment houses. Sixteen platforms submit data to Matrix Solutions, including 15 at fund and intermediary level. High platform coverage provides visibility of platform sales from fund managers not currently contributing directly to Financial Clarity.
 □ CF30 numbers may include qualified staff who are actively advising customers. Certain firms no longer have CF30's registered against them following a change in the regulatory regime in March 2016.
 □ Matrix is an ISS Market Intelligence company. □
